SIBELLE ARTHUR 39B

S/M FLECKVIEH CATTLE

2023 Sale Bulls

Welcome to the 2023 lineup of sale bulls at S/M Fleckvieh Cattle. These bulls are the product of **our 48th year** breeding Fleckvieh Simmental cattle, beginning in 1975.

The bulls sell by private treaty beginning in late February. They are pre-priced (see pg 15), so that if you are the only person asking for that bull by **noon on March 6**, he's yours at that price. A new wrinkle this year that was asked for by our return customers, is that if more than one person asks for a bull, we will contact you to arrange a **telephone bid-off after 6 pm on the evening of March 6**—only among the customers who have asked for that bull.

A half-down deposit will hold your bull until we semen check in late April. We'll give him his spring pre-breeding shots, including Bovishield Gold, Pinkeye and Footrot vaccines, and deliver to you within 250 miles.

Expected Progeny Differences (EPDs)

We pay close attention to EPDs, aiming for a balance of the most important economic traits. After generations of breeding to lock in dependable genetics, you will see the results in the balanced EPDs of these bulls. There are calving ease bulls that also have good growth and maternal EPDs, and there are high growth bulls with useful calving ease and maternal trait EPDs.

| A sample EPD chart S/M Kingston K071 | CE | WW | YW | MCE | MWW | API | TI |
|---|----|----|----|-----|-----|-----|----|
| | 13 | 67 | 96 | 7 | 75 | 126 | 72 |
| | 3 | 65 | 60 | 5 | 30 | 1 | 10 |

On this sample chart, the top numbers are the raw EPDs for each trait as calculated by the American Simmental Association. The bottom row of numbers are the animal's ranking among all fullblood cattle in the breed.

For example, this bull is in the top 3% for Calving Ease, the top 60% for Yearling Weight, his Maternal Calving Ease is in the top 5%, and his All Purpose Index is in the top 1% for fullblood cattle in the ASA database.

Explanation of the EPD Chart

CE = Calving Ease Index
 WW = added pounds Weaning Weight
 YW = added pounds Yearling Weight
 MCE = Maternal Calving Ease Index
 MWW = added pounds Maternal Weaning Weight
 API = All Purpose Index
 TI = Terminal Index

The bottom number on the chart (with each bull) reflects the rank of that EPD, eg. an EPD ranking 10 is in the top 10% of Fullblood Simmental bulls.

Fullblood Fleckvieh Cattle

We breed only Fullblood Fleckvieh Simmental cattle, whose genetics trace to the original Fleckvieh of Germany and Austria where these stout beef-type Simmental cattle originated. Being Fullblood offers the maximum hybrid vigor when crossed with other breeds of cattle.

The Fleckvieh female's moderate frame, natural easy fleshing and big volume capacity help her stay in good condition and rebreed on schedule year after year, on grass and poorer roughages.

Our Breeding Goals

We focus on economic traits that add value:

- Type – big-volume, deep-fleshed cattle that are soggy, long and thick.
- Calving ease, both direct and maternal — in a range that works under commercial conditions.
- Females – tight udders with small teats, feminine, sound feet and legs, with the depth and barrel to thrive on grass and corn-stalks.
- Disposition – docile and easy to handle.
- Polled – as one of several important economic traits.
- Color – non-diluted dark red with lots of protective pigment.

Our Fullblood Fleckvieh Simmentals are run like commercial cattle, so we know how they work in the real world. We select for performance, disposition and soundness, and grow out only the best as sale bulls. They are developed slowly on a high-roughage diet of free-choice grass hay, a half oats/ corn grain mix, and access to a Flaxlic mineral tub that boosts semen quality. They grow well but stay in their working clothes, so that they're sound, fertile, ready to go to work — and will stand up for years of service for you.

Please check out our website at:
www.smfleckvieh.com. Text, email or call to talk about your program, and ours, and how we can help you breed for profit.

3/26/2022 BW 110 AWW 797/ 108 AYW 1279/ 106 Horned

Virginia Walker 97W
 Sibelle Arthur 39B
 Sibelle India 25W
 Crossroad Radium 789U
 S/M Zaila F681
 JNR Petra II

Maternal brother
 S/M Judah J681

S/M Kilovolt K681 is a big, soft, soggy chunk of a bull — much like his maternal brother that sold last year to Chad Ledbetter in Oklahoma. His Radium sired dam is feminine in her type, and consistently productive.

Top weaning and yearling performance. A teddy-bear disposition. Dark red pigment down to his big black hooves. He will pack the pounds on his calves, without sacrificing anything in thickness, easy-keeping, and productivity in his daughters (I wrote the very same thing last year about his brother).

Of all the Sibelle Arthur 39B calves over eight successive calf crops, this bull reminds me most of his powerful sire. Herd bull time.

If you're looking for consistent performance, beef-type bulls as attractive as they come—these two 3/4 brothers by Sibelle Arthur 39B will turn your head.

Fully pigmented with black hooves, so dark red he LOOKS almost black. A heads-up herd bull appearance, yet he's quiet and easy to be around. A full brother (pictured) is working for Kaleb Kracht, Edgerton, MN.

His dam D561 is one of the prettiest cows to grace our pastures—an ultra-feminine female that kicks out these masculine, powerful bulls—just like they're supposed to do.

S/M Franchesca B141

Here is S/M Keystone K141, a maternal brother to S/M Diesel D141 (pictured)—a bull we bred, the most consistent calving ease sire we have used, and sire of some beautiful females here as well.

No wonder he's good—dammed by my all-time favorite female, the polled, productive Anchor T Legend daughter, S/M Franchesca B141.

K141 himself is a deep mahogany red down to his black feet. He's wide-topped, soggy and deep-sided—in type he's much like his popular Canadian sire Double Bar D Pol Manchester.

KFFC Candy Yakima

The second of two Double Bar D Pol Manchester sons—a sire we imported semen from Quebec for the deep, thick, big-bodied type, and dark red heavily pigmented coat color he fixes (as I noted in his footnotes in Reference Sires).

S/M Keynote K515 is dammed by KFFC Candy Yakima, the matron of a cow family we added from the Keith Franck dispersal (which I think was Keith's best cow family and dam to a young herdsire now at Great Guns Texas). These females are moderate in stature, feminine, and out-produce themselves. K515 is a maternal brother to the dam of S/M Kingdom K733. The quality of these calves tells me that yes, this cow family was indeed a good investment.

K515 is a deep dark red, has black hooves, is almost entirely pigmented, and moderate in type like his dam.

S/M Jurist J361

Here's a homozygous polled heifer-bull candidate for you. Calving Ease and All-Purpose Index EPDs that are earned by generations of calving ease sires are stacked end on end in this bull.

S/M Kiefer K361 is smooth in his make-up, and long, long, long. His type comes from his polled Anchor T Legend dam (note an almost identical type in his maternal brother S/M Jurist J361 (pictured above)). He arrived with a modest birthweight, yet he knows how to grow—the kind of birth to finish spread that we aim for.

These homozygous polled heifer-bull candidates, as royally bred as this guy is, are a rarity to find.

Tryon Bonnie FF2E

Emperor
S/M Addie C551
S/M Anna U581

Another homozygous polled bull, S/M Konrad K551 is more of a power bull. He has some extra frame, extra length, extra muscle, extra pounds to him.

Please note that he tested positive for diluter—so is going to work very well on a herd of red cows.

Year after year his feminine dam punches out bulls with this kind of power. Note the powerful, soggy son S/M Johann J551 (pictured) that she produced last year. It's fun when a pretty female like this, dams bulls this masculine and strong.

 FSS Xtra Stout 20X
 S/M Franchesca Z122
 S/M Franchesca W191**

S/M Jonah J122

The youngest bull in our offering, S/M Kurtis K122 is another (and the last) good growth bull produced by the old matriarch of a top cow family here, S/M Franchesca Z122.

She has been a powerhouse cow for us, every son a sale bull (see her last year's calf S/M Jonah J122 pictured above) and several daughters retained as some of our best females.

The bull is a stretchy, bigger framed calf considering his age—yet deep and thick enough to balance it all out in an attractive looking package.

Considering how good this old cow was and how gorgeous are our first daughters of FGAF Granger 060G calving now—I would use him to breed for his daughters and keep every one of them.

2/20/2022 BW 68 AWW 718/ 98 AYW 1217/ 101 Polled/S

ABR Sir Arnold's Image
 Sanmar Polled Pharao 12P
 Sanmar Pol Teardrop 12M

S/M Diesel D141
 S/M Julia H201
 S/M Juliette X201

Another heifer-bull candidate, S/M Kaiser K201 arrived with a small birth weight, unassisted out of a first-calf heifer. He has two generations of easy calving sires behind him. Both Sanmar Polled Pharao 12P and S/M Diesel D141 we completely trust on heifers and have never pulled or assisted a calf by these sires.

S/M Kaiser K201
 at weaning

Kaiser has grown into a bigger, longer, stretchier-made calf for a heifer-bull candidate. He has developed small, loose scurs that we've left on. He has a unique personality—very friendly and curious, he stands by the gate (like in his photo) and “talks” to us.

We've found that these bulls, created by using generations of calving ease sires on our heifers, are justifiably pretty popular.

Tested Non-Diluter

 KFFC Engrid Cade
 KFFC Candy Yakima

S/M Kingdom K733
 at weaning

What a chunk!

We were surprised when we weighed bulls for yearling weights that this solid-made bull had the heaviest actual yearling weight in the bull pen. It demonstrates

what we've claimed for years about these Fleckvieh cattle—that pounds of beef are found not in bone and height—but in length, depth and width.

S/M Kingdom K733 is the second sale bull this year from the small cow family headed by KFFC Candy Yakima that we purchased from the Keith Franck dispersal. Like this bull, those females are moderate framed—but powerful for the pounds of beef in them.

He's also a testament to our new Kuntz Kingpin 2H sire, and the balanced spread calving ease, thickness and growth that he has and passes to his calves.

 S/M Rebecca T071

S/M Rote E071

If you like chrome and good cattle, you've gotta love this bull.

As Kingpin consistently does with his calves, he began life small then took off about mid-summer and has grown into just a beautiful, big-haired, big-topped, big-middled beef machine.

He's a heifer-bull candidate too, born at 79 pounds from a mature cow and generating a +13 calving ease EPD. In fact, with the light birthweights from Kingpin's first calf crop we opted to use him on heifers this year (and when we saw how his calves weaned off wished we'd run him with the whole herd instead).

His dam S/M Rote E071, pictured above, is a lovely young cow that is moderate in her type, as thick, soft and easy-doing as they come.

Double Bar D Double Down 142H

When it came time to name this K592 bull calf, the only polled son of our new Double Bar D Double Down 142H sire—Kandu seemed the natural fit—given that we purchased this amazing hulk of a sire to “Double Down” on the best of what Fleckvieh cattle “Kan du.”

S/M Kandu K592 is dammed by a young, feminine and milky PHS Bank Roll 345B daughter—going back to an old cow family here that originates from an Arnold Bros. family that we began with in the 1980’s.

He’s a big calf, lots of middle, and lots of growth to him as we’d expect. All that, with a polled head, in an attractive, heavily pigmented powerhouse of a bull. Expect extra pounds of beef, and attractive, productive, milky daughters as well.

DOUBLE BAR D DOUBLE DOWN 142H

3968313 3/05/2020
 BW 94 AWW 1055
 YW 1575 Horned
 Non-Diluter

We renamed this massive son of Anchor D Motown, for what we expected him to do for us: Double Down on the thickness, muscle, barrel and correctness of this young bull.

His sire Motown has earned a reputation for calves that are big-middled, deep-fleshed, the ideal Fleckvieh type. Double Down was number one for both weaning and yearling performance among his herdmates in the Double Bar D herd, no accident as he's also out of a big-bodied, high-performing Juggernaut daughter. His first calves born in 2022 DO have his power. They ARE thick and correct. Only one bull this year but more are arriving now.

Breeding Soundness Guarantee

Bulls will be semen tested and given a Breeding Soundness Evaluation by a licensed veterinarian prior to delivery. If a bull fails his evaluation, or is hurt before delivery, your deposit will be returned.

As per the ASA Standard Guarantee, bulls are guaranteed to be breeders (defined as the ability to settle healthy cows by the time the bull is 18 months of age) with the exception of:

- injury or disease occurring to the animal after time of sale
- gross negligence or willful misconduct on the part of the purchaser
- bulls shown competitively after sale

There is no guarantee that the bull will freeze semen. Seller will not be liable for any damages beyond either replacement or refund for a bull that is proven in his first season to be a non-breeder.

Please if your bull isn't breeding, let us know as soon as you confirm it so that we're aware of any problem with him.
